

Learning Link

Ages Birth-5 years old

Learning Link

Learning Link is a free interactive classroom where parents and their children ages 0-5 can come to play and learn together. The goal of Learning Link is to develop school readiness skills during early childhood. Learning Link features specially designed play activities planned by an early learning specialist that incorporate the use of common objects found in the home so activities can be easily recreated at home. Families will have access to traditional classroom play areas where parents will learn strategies to best engage their child in meaningful play. No enrollment or appointment is necessary and all children must be accompanied by a parent or guardian.
